Welcome to Master of Science Programme in Mechanical Engineering with Emphasis on Structural Mechanics
120 credits
Congratulations on your admission to the Master of Science Programme in Mechanical Engineering with Emphasis on Structural Mechanics 120 credits, at Blekinge Institute of Technology (BTH).

Practical information

This programme will prepare you to contribute to advanced product development or to conduct research in mechanical engineering. On completion of the programme, you should master a coordinated approach to working with analysis to support decision making in the product development process, with focus on performance prediction and ensuring intended functionality.

The programme runs full-time from August 29th, 2016 to June 9th, 2018. If you cannot arrive before the programme starts, you must notify the programme manager, Dr. Ansel Berghuvud at ansel.berghuvud@bth.se before August 22th, 2016. The last date for your arrival is August 29th, 2016.

If it for some reason is impossible for you to join the programme in time, i.e. before 2016-08-29 you will lose your seat in the programme – this is important!

If you are unable to join, you should seek deferment to be able to start your programme at the next time it is provided. You find the information about this in the student portal (http://studentportal.bth.se).

Starting your studies

Introduction of the programme

You are expected to be on campus in Karlskrona by the latest at the start of the programme and ready to begin your studies on the two courses

MT1472 Dynamics of Mechanical Systems
You will find the schedule for your courses before they start through this link: http://schema.bth.se

Roll call meeting

A mandatory roll-call will be carried out and information will be given on the first day of the programme

August 29th 2016 at 10:15-11:00 in room J1270.

Participation is required at this the first session.

More info and contact

There is some useful information on how to get started as a new student at BTH, please see the following links for more information:

The student portal:
https://studentportal.bth.se/web/studentportal.nsf/web.xsp/

Prepare your arrival at BTH:

http://www.bth.se/eng/applying-for-studies/prepare-your-arrival-at-bth/

You can direct general questions to Studentcentrum:
studentcentrum@bth.se

For programme related issues you can contact the programme manager via e-mail:
ansel.berghuvud@bth.se
